

Leather samples Italy Dream Design

SOFT LEATHERS AND SADDLE LEATHERS

It is possible that the leathers in the various categories can have some light differences of the colour tone from one dye to another. These differences of colour tone come back in the tolerances and therefore not imputable to the manufacturer. Consequently it is not possible to ask for replacements or damages. It is your right to ask for samples from stock before starting production.

The instructed tanneries choose only exclusively **the best cowhide from all Europe** that is submitted to suitable treatments of chrome tanning and colour on all the thickness of the leather. The leather is dyed with **non-toxic colours**. All the leathers in the collection are **free from pentachloraphenol**.

PA - Pelle Atelier:

Cow full grain leather with different thickness from 1,0 to 1,5 mm. All the different leathers of this cathegory are submitted to very special and precious processes with aniline. These treatments give to every single skin some superficial effects and colour tonalities that are different from skin to skin; therefore there could be different superficial effects and colour tonalities also on the same finished product. For this reason we will never accept any claim relative to the variability of the superficial effects or colours.

Because these leathers are not treated with any superficial covering agents, they are very delicate and need great care and attention:

- in the event of liquid spills, they need to be dried immediately before the liquid infiltrates the material and leave indelible stains;
- avoid placing leather in direct sunlight, in order to avoid colour fading;
- keep away the leather from direct heat sources.

PA - PAINTERS:

full-grain leather, thickness 1.0/1.2 mm; chrome tanning, barrel aniline colouring. Treatment of re-tanning and fattening with special synthetic and vegetal oils giving an unreachable tenderness and plumpness of the leather. Natural grain, matt aspect and non uniform colour.

PA-STARS:

full-grain leather, thickness 1.0/1.2 mm; chrome tanning, barrel aniline colouring. Superficial hand-made sand-paper treatment and glossy laminate finishing. Natural grain and non uniform colour.

PA - GREAT PLAINS:

leather finished with hair, thickness 1.4/1.5 mm; chrome tanning, shaven hair.

PA - SWEETS:

full-grain leather, thickness 1.1/1.3 mm; chrome tanning, barrel aniline colouring. Superficial treatment with pure aniline finishing. Natural grain, matt aspect and non uniform colour.

SOFT LEATHERS AND SADDLE LEATHERS

PX - Pelle Extra:

Cow full grain leather with different thickness from 1,3 to 2,2 mm. All the different leathers of this cathegory are submitted to very special and precious processes with aniline. These treatments give to every single skin some superficial effects and colour tonalities that are different from skin to skin; therefore there could be different superficial effects and colour tonalities also on the same finished product. For this reason we will never accept any claim relative to the variability of the superficial effects or colours.

Because these leathers are not treated with any superficial covering agents, they are very delicate and need great care and attention:

- in the event of liquid spills, they need to be dried immediately before the liquid infiltrates the material and leave indelible stains;
- avoid placing leather in direct sunlight, in order to avoid colour fading;
- keep away the leather from direct heat sources.

PX - RUSSIA:

full-grain leather, thickness 1.3/1.5 mm; chrome tanning, double aniline barrel colouring and superficial treatment with semi-aniline. Natural grain and non-uniform colour.

PX - PATAGONIA:

full-grain leather, thickness 1.4/1.5 mm; chrome tanning, vegetable retanning, barrel aniline colouring and superficial treatment with semi-aniline. Sandpaper treated surface. Natural grain and non-uniform colour.

PX - WINE REGIONS:

full-grain saddle leather patinated and drummed, thickness 1.8/2.0 mm; chrome tanning, vegetable retanning, barrel aniline colouring. Superficial treatment with water, wax and resins, creating the classic marbled effect. Natural grain, glossy and non-uniform colour.

PX - 70's:

full-grain leather, thickness 1.3/1.5 mm; chrome tanning, barrel aniline colouring. Handmade superficial sand-paper treatment. Complies flammabilitytest UNI EN 1021-1 and 1021-2 and California Test TB 117 Section E. Natural grain and non-uniform colour.

PX - WOMEN:

full-grain leather nabuk effect, thickness 1.2/1.4 mm; chrome tanning, barrel aniline colouring. The item complies with the 3M Scotchgard™ treatment test for oleo, hydro and dirt repellency. Complies with the flammability test UNI EN 1021-1 and 1021-2 and the California Test TB 117 Section E.

PX - AVIFAUNA:

full-grain leather, thickness 1.2/1.3 mm; chrome tanning, barrel aniline colouring and superficial treatment with semi-aniline. Natural grain, semi-glossy aspect and non uniform colour.

SOFT LEATHERS AND SADDLE LEATHERS

PF – Pelle Fiore:

The leathers of the PF family are first-quality full-grain bullock hides, thickness 1.2/1.4 mm; they are chrome tanned, then chrome re-tanned. They are coloured in barrel through their entire thickness, followed by a treatment of superficial varnishing. All of the products are finally treated with special agents that make them water repellent for a limited period.

PS - Pelle Mezzo Fiore:

The leathers of the PS Family are half-grain bullock hides, thickness 0.9/1.1 mm. They are chrome tanned; they are coloured in barrel through their entire thickness (the dyes are mixed with aniline and fast non toxic colours), followed by a treatment of superficial varnishing, fattening with natural and synthetic oils, wet-frame dried; final treatment of superficial spray varnishing with resins and pigment. The final aspect is a soft effect with semi-opaque look and natural grain.

CF - Cuoio Pieno Fiore:

The CF family hides are first-quality full-grain half-bull hides, thickness 3.0/3.2 mm.. The hides are chrome tanned, then mixed chrome/vegetable re-tanned. They are coloured in barrel through their entire thickness (with non-toxic colours), machine and vacuum dried and finally treated with a superficial spray varnishing. All of the products are finally treated with special agents that make them water repellent for a limited period.

CS - Cuoietto:

The CS-cuoietto family is made of lower grain half-bull hides, thickness 2.4/2.5 mm. The hides are chrome tanned; they are coloured in barrel through their entire thickness (with non toxic fast colours), machine and vacuum dried; final treatment of superficial spray varnishing. The hides are finally treated with special agents that make them water repellent for a limited period of time.

Cat. PA - Painters
Full grain leather 1,0 / 1,2 mm.
